### **Carl Gustaf Lundin** **Executive Committee**

Carl Gustaf Lundin, Principal Scientist at IUCN's Global Marine and Polar Programme, works to develop the programme in four areas: marine protected areas; building partnerships for conservation of ecosystems and endangered marine species; sustainable fisheries management; and climate change effects on marine resources. He is responsible for all aspects of managing the programme as well as fundraising and development of public information materials.

Before joining IUCN in 2001, he worked with the World Bank for more than 12 years. His primary focus was coastal and marine management issues in several regions of the world including Argentina Coastal Contamination and Marine Pollution project; China Coastal Development Project; Eritrea Port Project; Indonesia Coral Reef Rehabilitation and Management Project; Mexico's Natural Protected Areas Project 1 + 2; Mesoamerican Biological Corridor Project; Aquaculture Development Project; Seychelles Biodiversity and Marine Pollution Project; and the Uruguay Maritime Management Project. He has worked on a wide range of reports and publications in this field as well.

He received a Bachelors' degree in Biology from Uppsala University in his native Sweden, and a Licentiate in Philosophy, Natural Resources Management, from Stockholm University.
